

Where to find us in Europe:

Map of the towns of the area:

NATUR-ACEITES DE ANDALUCIA S.L.

A family business founded in Casarabonela in the heart of the Natural Park “Sierra de las Nieves” declared in 1995 Reserve of the Biosphere by UNESCO and in 2006 integrated into the Reserve of the Intercontinental Biosphere of the Mediterranean Andalusia (Spain)- Marruecos.

NATUR-ACEITES DE ANDALUCIA

produces a 100% natural olive oil extracted from mature olive trees in the heart of the Natural Park.

The types of olive trees used are: Campinesa, Picua, Picual and Manzanilla Aloreña, the latter being the predominant and exclusive to this area.

Manzanilla Aloreña

The characteristics of this olive oil are:

Sweet on the palate, because it has a low “oleuropeina” (a bitter component), smooth and intensely fruity with a hint of almonds and fresh herbs and an aroma of ripe tomatoes

The subtlety of its flavour is influenced in large part by the micro- climate of the area with more than 3000 hours of annual sunshine and the mature olive trees.

Our facility has as its three primary objectives:

- 1° Respect for nature
- 2° Traditional methods
- 3° Implementation of innovative technologies

The process of pressing is carried out at ambient temperature without additives using traditional methods with quality assured processes. It has Ecological Certification by **Sohiscert**.

The operation of extraction is much cleaner and environmentally friendlier due to the use of a modern processing system.

Harvesting the olives

the arrival of the olives in the press

Pulping the olives

extracting the oil
